

## Unloading auger ø100 , ø150

Use info :  
Auger generally used for lifting the milled waste material, such as milled wood or plastic, usually employed for the filling of the big bag.

### Technical sheet

	overall dimensions	Power consumption	Weight
ø100	width 360x50 cm, height=220 cm Hopper 50x50 ext. diameter 10cm, adjustable output height	1.1kW / 400 V	100kg
ø150	width 360x50 cm, height=220 cm Hopper 50x50 ext. diameter 15cm, adjustable output height	1.5kW / 400 V	130kg

**Machine composition:** strong in carbon steel structure, transmission with worm gear, variable height by changing the positioning of the legs.

**Noise in idle operation:** below 70 dB (A).

**Warranty:** 12 months.

MACHINE COMPLIANT WITH THE STANDARD **CE**
